

### **Research Participants Needed**

- Are you a mother diagnosed with a chronic illness (MS, diabetes, heart disease, etc)?
- Do you have a child who is in middle or high school?

If you answered yes to both of these questions, then you may be eligible to participate in a research project investigating how parental chronic illness may affect their children's school performance and behavior. This research is being conducted by researchers at the Graduate School and University Center of City University of New York (CUNY). You will be asked to complete a questionnaire (about one hour to complete) and will be compensated with \$10. For more information contact the principal investigator, Mr. Yung-Chi Chen at [YCHEN8@GC.CUNY.EDU](mailto:YCHEN8@GC.CUNY.EDU) or 917-365-7619.

This research study has been approved by the CUNY IRB and the funding source is the CUNY Graduate Center. The National MS Society is making this information available for client information only and does not necessarily endorse the study.
